FASTENERS Pvt. Ltd.

ABOUT US

Established in 2012, Radadia Fasteners Private Limited started its journey as a pioneer to become a leading industry of the fasteners world. It is located in green city Gandhinagar, capital of Gujarat.

We have team of staff united and positive to provide you with more perfect services of manufacturing Industrial Fasteners for Power Transmission, Railway Electricals, PEB Structures, Telecom, Guard Rails, Construction, etc. The company is well equipped with all in-house facilities for manufacturing of Nuts, Bolts, as per any specification viz. IS/DIN/ASTM/BS or as per customer requirement. We are prepared for any type of finishing viz. Zinc Plating, Hot-Dip Galvanized Nuts, Bolts, Plain and Spring Washers for Transmission Line Towers, Sub-Station Structure including Anchor and Foundation Bolts.

The company has a flawless infrastructure, advanced machines and highly qualified engineers who maintain the quality till the end of product.

Rich experience, integrity and reliability are the bedrock of the company's foundation. We are vowed to provide quality standard, kaleidoscopic nature of services for our customers. This enables us to keep on adding new products to our range and give value for money to our customers. Our good business practice and transparent mode of working will lead us to a long term relation and customer's satisfaction.

MISSION

"We are committed to comply with the most exacting customer needs and provide satisfaction through prompt supply of right quality products, at the right time, in the right quantity and at the right price"

Our continuous innovation program for our special production process is **"never ending"**.

VISION

Radadia Fasteners Private Limited has an overarching vision, which provides a vast and lofty inspiration goal to the employees. Our vision is "We are what we repeatedly do. Excellence, therefore, is not an act but a habit"

We shall be recognised as one of the premier provider of products of fastening world.

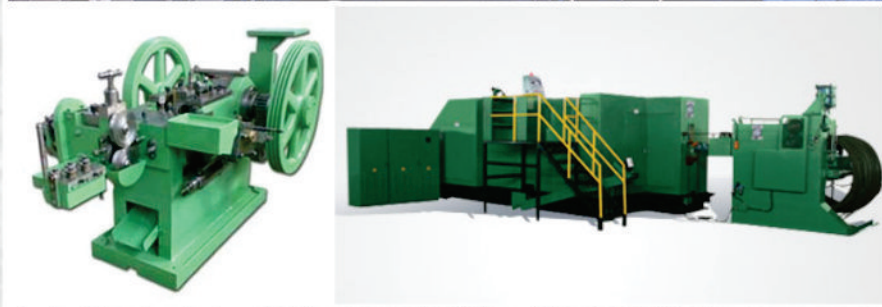

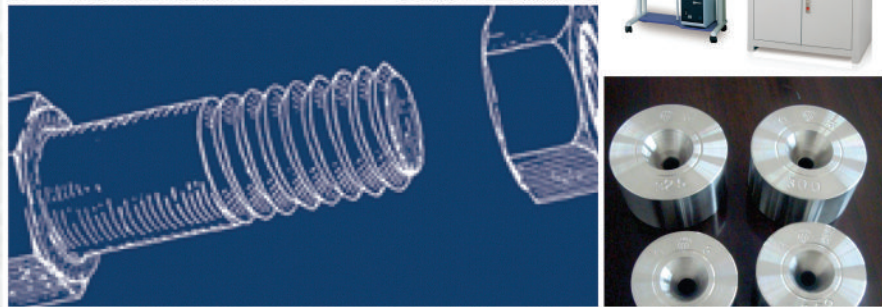

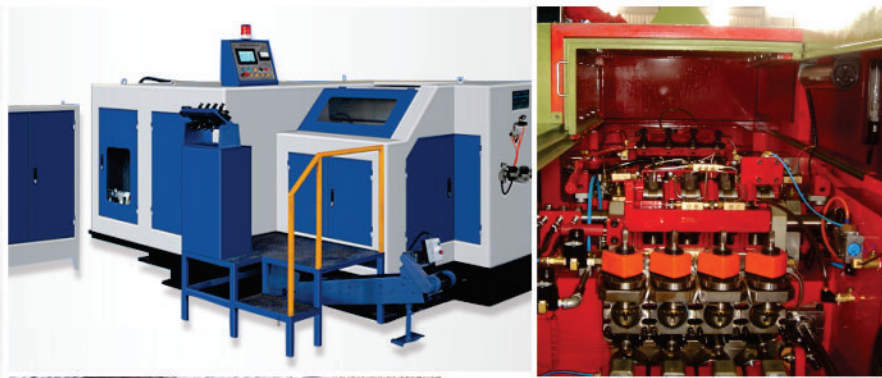

Quality

At Radadia Fasteners Private Limited, we have our own parameters to maintain highest standards of quality control and assurance adhering to the set industry norms.

The inspection activity starts right from the receipt of raw material and continues throughout the manufacturing and galvanizing process until final shipment. The inspectors are authorized to abort the process at any stage, if the products are found to be deviating from standards.

We shall Endeavour to achieve this through continual improvement in all areas of management enhancing, employer and supplier participation with sole motto "Quality everywhere"

As, the processing of steel involves high energy cost and often result in pollution sustained efforts are also being made to reduce the consumption of energy and to optimized resource utilization so as to keep pollution within the prescribed norms. Apart from this, efforts are also being made to provide our work force with an accident free work environment.
